Verification of Disability

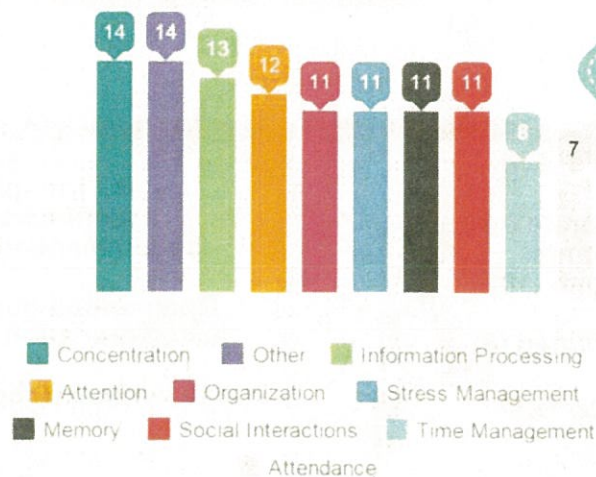

In order to verify a disability, institutions request that health care practitioners confirm that the student has a permanent, temporary or a non-disabling condition. OSDs also ask for a clear diagnostic statement (including DSM criteria), the date of onset and to confirm how long the student has been the practitioner's patient.

Functional Limitations Rated

What?

Health care practitioners are asked to assess a number of functional limitations when commenting on a student's requirement for academic accommodation.

Rating Systems

2 No Impact, Mild, Moderate, Significant

6 No Impact, Mild, Moderate, Severe, Don't Know

1 Mild, Moderate, Severe, Unknown

4 Open-Ended Question(s)

1 Limitation, Restriction

13 Select Functional Limitation From a List
